PROFESSIONAL SUMMARY

Full-stack and applied AI engineer building production web applications, AI-powered SaaS products, and custom integrations. Own projects from requirements and architecture through deployment and support, with experience across TypeScript, Next.js, Node.js, PostgreSQL, and LLM APIs.

EXPERIENCE

Alpha Dog Agency | Web & Software Developer

2024 - Present | South Bend, IN

- Build and maintain production websites, web applications, and custom software; translate client requirements into technical solutions from concept through launch.
- Develop API and webhook integrations connecting CRM systems, forms, SMS, email, and databases; build internal AI tools with Next.js and LLM APIs.
- Manage deployments and infrastructure across Vercel, Railway, Cloudflare, and VPS/cPanel, including DNS, SSL, domain migrations, and production troubleshooting.

Bryan Develops | Independent Software Developer / Owner

December 2022 - Present

- Build custom web applications and SaaS products with React, Next.js, Node.js, databases, authentication, payments, and cloud deployment.
- Own requirements, UX planning, architecture, integrations, and support; direct and review AI-assisted development while retaining responsibility for final output.

SELECTED SOFTWARE PROJECTS

SimplAssist | AI Communication SaaS

Built a multi-tenant platform for missed calls, SMS, web chat, and appointment workflows, including AI conversations, authentication, onboarding, billing, and email integrations.

Next.js, TypeScript, Supabase, PostgreSQL, LLM APIs, Telnyx/Twilio, Stripe, Resend

SimplSEO | AI SEO SaaS

Built an application that turns Google Search Console data into recommendations for small businesses, including low-CTR pages, ranking and content opportunities, and an AI SEO mentor.

Next.js, React, Firebase, Google Search Console API, OpenAI

Agency AI Website Concept Generator

Built an internal Next.js application using the Anthropic API to generate website concepts and structured project blueprints from client requirements.

Customer Feedback and Review Automation

Connected survey webhooks, Twilio SMS follow-up, Supabase storage, and conditional Google review routing in a Node.js application deployed on Railway.

TECHNICAL SKILLS

Languages and frontend: TypeScript, JavaScript, HTML, CSS, React, Next.js, Tailwind CSS
